Levee Inspections**
LMA District Cover Sheet
Spring 2019 Levee Inspection Results

Reclamation District No. 0755 Randall

	Spring (March - May)	Summer ** (June - August)	Fall (September - November)	Winter ** (December - February)
† Overall LMA Rating (Fall Only)				

** Non-receipt of Summer or Winter Inspection
Reports may effect overall annual rating.

† SPRING INSPECTIONS: Overall maintenance ratings are not determined for the spring inspection results. Individual maintenance deficiencies are rated using the same criteria in the spring and in the fall.

FALL INSPECTIONS: The overall maintenance rating shown above is based on operation and maintenance deficiencies identified within the attached unit inspection reports. This rating is not intended to be an indication of risk.

Date of Inspection	3/15/2019 - 3/15/2019			
DWR Inspector	David Julian			
Accompanied By				

Summer & Winter Inspections

The Local Maintaining Agency (LMA) is responsible for summer and winter inspections. The LMA is required to submit a report regarding summer and winter inspections to the California Department of Water Resources (DWR).

DWR must be informed on the:

- a) completion of the inspection
- b) any changes other than the results of normal maintenance
- c) corrections to deficiencies noted in this report

If additional items are noted, further documentation of those items must also be submitted.

The LMA should submit this information to DWR using the LMA web application tool available at:

<http://cdec.water.ca.gov/lma.html>

If the LMA is unable to submit information on this webpage, please contact DWR for assistance.

The LMA should submit the information and any associated documentation by September 30 for summer inspections and March 31 for winter inspections.

Levee Evaluation Comments					
Description:The damage consists of erosion of the lower waterside levee slope and bank approximately 27 feet in length along the east (left) bank of the Sacramento River. See attached pages for photos.					
Site location T06N R04E Section 28.					
Site ID No:327					
Site Designation:LMA-154					
Repair Type: Erosion					
Rating:Area of Concern					
Field Date:7/13/2017					
Notes: Pretty minor damage visible from the slope, site was originally identified by boat. Will look at again from waterside if there is time.					
Crown is a paved road. Original GPS was a little off, added correct point in start					

A photograph showing a rocky shoreline with green vegetation and a body of water. The water is blue and calm, with some ripples. The rocks are grey and jagged, and the vegetation is green and leafy. The sky is blue and clear.

A photograph showing a rocky shoreline. In the foreground, there are many grey, irregularly shaped rocks. A long, light-colored log lies horizontally across the rocks on the left side. To the right of the rocks, there is a dense patch of tall, green grass or reeds. The water is a deep blue-grey color and occupies the left half of the image. In the background, there is a line of green trees under a clear sky.

Levee Evaluation Comments					
Description:The damage consists of erosion of the lower waterside levee slope and bank approximately 322 feet in length along the east (left) bank of the Sacramento River. See attached pages for photos.					
Site location T06N R04E Section 29.					
Site ID No:328					
Site Designation:LMA-155					
Repair Type: Erosion					
Rating:Area of Concern					
Field Date:7/13/2017					
Notes: Could not access most of the lower portion of the slope because of vegetation, but there was rip rap just downstream of the site. Looked like it may have been missing on part of the site. Erosion looked like it may be 1/2 the length reported. Crown is a paved road

FS_ID:17143 DS_ID:18858 EP_NO: 11219 Repair Type: Non-Urgent Crossing Status: Found UCIP Comments: - Pump and walkway seem abandoned.- Power line is not connected with pump.- A pump house like structure found on LS levee toe. FIELD_STRUCT_DESC: 16-inch irrigation discharge pipe of an unknown material through the levee, invert elevation 8.5 feet below the crown. Pump on a pile structure in the river. Walkway to the pump. Siphon breaker and power pole on the landside (LS) slope. Electrical conduit through the levee at the same location. (Retention of a 14-inch pipe through the levee, 8.5 feet below the crown, a pump on a pile structure in the river, a walkway to the pump, and a siphon breaker on the LS slope authorized under Automatic Board Order (ABO) issued as Permit No. 11219, 1975 - David J. Jr and Bonnie Elliott). [Additional Reference(s): DWR Levee Log, 2005, 14-inch pipe referenced. USACE Sacramento O&M Manual 111, May 1959, (RM 35.02), 14-inch pipe referenced, incorrectly referenced in Reclamation District No. 551 (RD0551)]. FS Date: 8/6/2013

Reclamation District No. 0755 Randall

Landscaping on landside should be maintained to allow inspection and access to levee slope and toe.

A photograph showing a rocky shoreline with sparse, dry vegetation. In the foreground, there are several green, fern-like plants and some dry, brownish grasses. The ground is covered with small, light-colored rocks and pebbles. In the background, a body of water is visible, with a dark, silty or muddy appearance. The water's surface is slightly rippled. The overall scene suggests a coastal or estuarine environment.Page 26 of 27
